

Averon Solutions

Integrated industrial capability. Delivered as one service.

Engineering • Gas packages • Plant maintenance • Trading • Digital

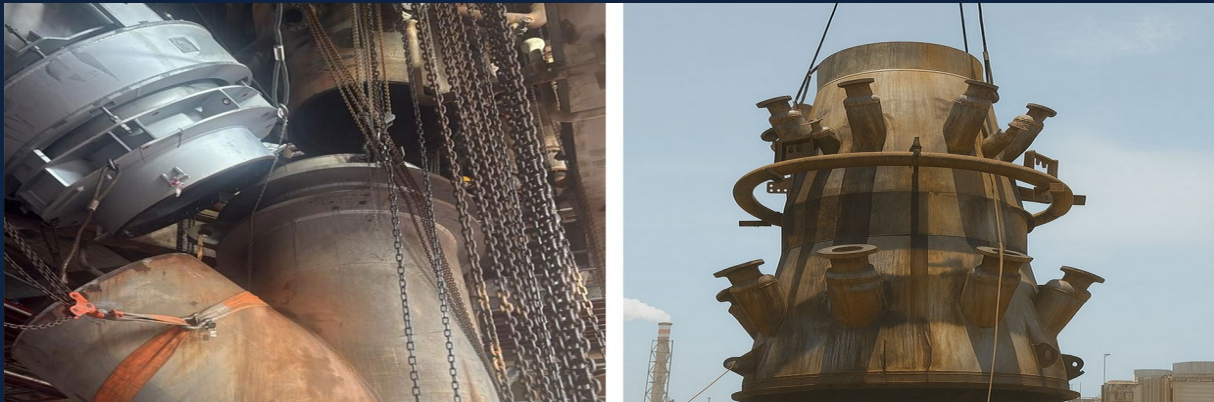

Engineering & BIM

Petrocon model | FEED, detailed design and BIM.

Packaged equipment

Gas conditioning, metering, vessels — design, fab and test.

Shutdowns & fabrication

Turnaround execution, heavy lifts and shop / field fabrication.

Plant & field works

Installed packages and electromechanical work on live plants.

Capability in delivery sequence

01

Engineering & BIM

FEED, detailed design, 3D / BIM and site engineering support.

02

Gas packages & vessels

Pressure reducing, metering, fuel-gas conditioning and ASME equipment.

03

Shutdowns & fabrication

Turnaround execution, shop fabrication and field heavy works.

04

Industrial trading

HSE stores, tools, consumables and camp support — not project bulk material.

05

IT & digitalisation

Enterprise applications, cloud, automation and managed services.

SELECTED ENGINEERING PROJECT REFERENCES

BERRI OFFSHORE PLATFORMS | SAUDI ARABIA

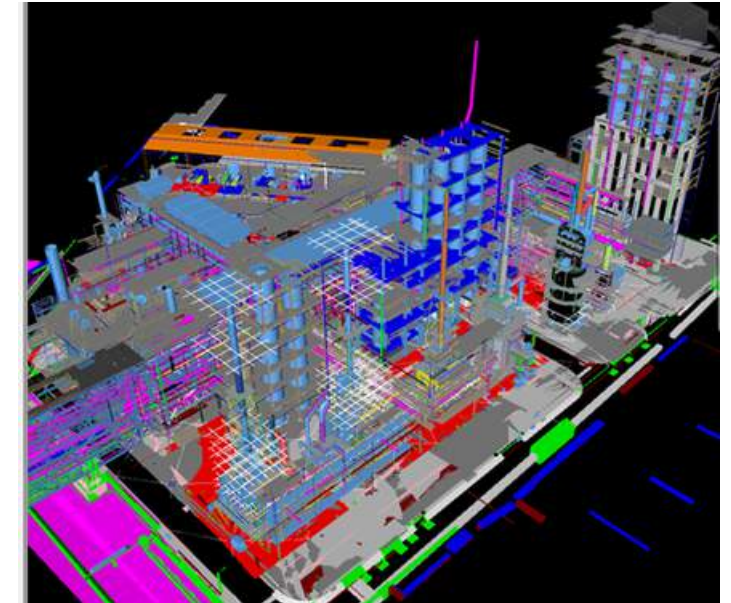

L&T / Saudi Aramco | CRPO 117 / 118 / 119
Offshore multidisciplinary engineering portfolio.

HAIL & GASHA | ABU DHABI

Saipem | Onshore engineering reference
Offshore structural steel detailing: 2,000+ MT.

ROVUMA LNG | MOZAMBIQUE

Saipem | Process-unit FEED
Onshore engineering reference.

Petrocon engineering model | Source profile p. 21

Source: Petrocon Company Profile, pp. 2, 20, 22, 34. References belong to Petrocon; Averon provides the KSA interface.

Engineering scope

Process & plant

Onshore / offshore PRE-FEED, FEED and detailed engineering. PFD, P&ID, hydraulics, HAZOP / SIL, equipment and layout.

Piping & pipelines

3D piping (SP3D / E3D), stress analysis, isometrics, MTO, pipeline engineering and as-built.

I&C and electrical

Control systems, cable and tray, power studies, illumination, hazardous-area design and as-built loops.

Civil, structural & steel

Foundations, structures, Tekla detailing, connection design, fabrication and erection drawings.

BIM & digital

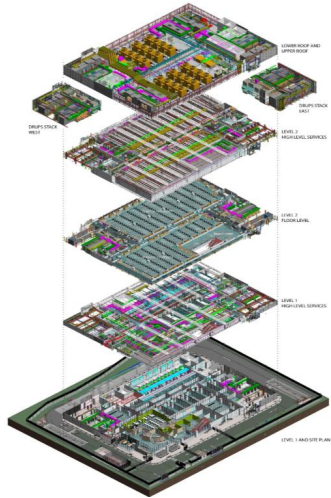

LOD 100–500, clash detection, 4D / 5D, scan-to-BIM, ISO 19650. Data-centre ACS + MEPF models to LOD 500.

Site engineering

White-collar assignment: draftsmen, QS, planning, PM / CM, QA/QC and construction management.

Data centres | BIM coordination to handover

Selected Petrocon references: models, coordinated services and construction documentation.

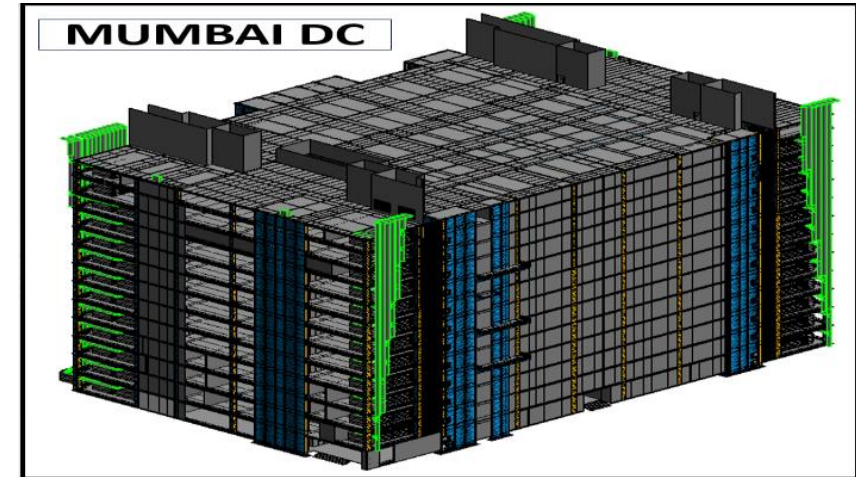

Global Switch

Hong Kong

85,000 m²
Contractor: Gammon
BIM management, standards,
reporting and asset data.

Project BIM model | Petrocon portfolio

Mumbai data centre

Server-rack BIM model from Petrocon's data-centre portfolio.

Microsoft HYD-11 & HYD-12, Hyderabad | Design & BIM: LOD 300 to LOD 500.
Construction coordination, shop models and as-built development.

Sources: Petrocon Data Center & Infra Portfolio, pp. 5, 9-12, 16. Images shown are BIM models, not site photographs.

Saudi Arabia | Selected Petrocon BIM references

Partner delivery experience supporting Averon's engineering and BIM offering in the Kingdom.

NEOM Shusha Island

Employer offices & accommodation

Architecture, structure and MEPF BIM
from 2D DWG inputs.

Two G+1 buildings:
524 m² each.

BIM scope excludes design.

ROSHN SEDRA Riyadh

Residential development

Project area: 110,250 m²
Plots: 10, 11 and 19
Phases: MS 1, 3, 4, 5 and 6

Listed with ROSHN, RETAL and Perkins
Eastman.

Alrayes Private Villa Riyadh

Coordinated residential BIM

MEP model and revised architectural
models: LOD 400.

Structural reference: LOD 300.

Shop drawings for basement through roof
levels.

Source: Petrocon BIM Profile 2025, pp. 15, 17. Project scope and areas are as stated in the partner profile.

Infrastructure | Project models with defined scope

Petrocon landscape, roads and utilities references - multidisciplinary BIM coordination.

SEVEN - Nahada | Saudi Arabia

134,848 m² | IFC input to LOD 400
Landscape, roads, signage and kerbs.
Completed within 4 months.

Project model: amphitheatre and bridge structure

Hub 06 & Hub 08 | Bahrain

Water reservoirs | LOD 200-400
131 drawings across disciplines.
Landscape, utilities, roads and grading.

Project rendering: reservoir compound

Source: Petrocon Data Center & Infra Portfolio, pp. 25-26, 31-33. Images are partner project models / renderings.

Packaged gas systems — design, fabrication and testing

Greater Noida | ASME U / U2 | National Board R | ISO 9001 / 14001 / 45001 | Hydrotest to 450 bar

Pressure reducing & metering

Stations up to 30-inch, Class 900. Ultrasonic, turbine, RPD, mass and orifice metering, with flow computer and gas chromatograph.

Fuel-gas conditioning

Scrubber, filter and heater trains for power and process applications. Gas flow capacity up to 330,000 Sm³/hr.

Compact / underground PRS

City-gate and CGD stations. Protection class IP67.

Process vessels

Knock-out drums, separators, filter-coalescers, desalters, heater-treaters.

CNG decompression

Cascade-fed high-pressure reduction with slam-shut protection and heating.

Gas treating & hydrogen

Gas drying, H₂S / CO₂ removal, PSA and membrane hydrogen packages.

Sources: AEL profile. ISO 9001 / 14001 / 45001 and National Board R renewal confirmed by Averon management.

AEL | Project photographs, customers and supplied packages

Autometers Energitec - equipment photographs paired with the corresponding customer and scope.

GPEC | Bangladesh

Ultrasonic metering + gas chromatograph

330,000 SCMH
12-inch | Class 600

North Oil Company | Iraq

Crude-oil custody-transfer metering

16-300 m³/hr
16-inch | 1-9 barg

CRISP | Singapore

Exxon / Tecnicas Italy

Fuel-firing skid package
Package photograph from AEL

Source: AEL profile, pp. 26, 27, 33. Photographs and specifications are from the respective project reference pages.

AEL | Hydrogen packages for HPCL Vizag

Selected manufacturing references supplied through process licensors.

UOP Honeywell / HPCL Vizag

PSA hydrogen-service skids
2 x 12-bed PSA units | 45 m each
Piping up to 18-inch, Class 600

Air Liquide / HPCL Vizag

Hydrogen membrane package
20 ASME U-stamped membrane vessels
3 skids, each 15 m long

Source: AEL profile, pp. 31-32. Actual package photographs reproduced from the partner reference pages.

AEL | Customer and project references

Partner project references across gas, liquids and hydrogen service.

Customer / project	Package and reference duty
KAR Group, Iraq	PRMS 18,000 SCMH 60-70 bar Class 600
RMG Atlas, Australia	PRMS 80,000 SCMH 10-inch Class 600
GPEC, Bangladesh	Metering + GC 330,000 SCMH 12-inch, Class 600
North Oil Company, Iraq	Crude CTM 16-300 m ³ /hr 16-inch
MEW, Kuwait	Fuel-gas conditioning 108,000 SCMH 14-inch, Class 300
BEC, Oman	Fuel-gas conditioning 4,000 SCMH 3-inch, Class 600
GAIL Vijaypur, India	Custody-transfer metering 150,000 SCMH 10-inch, Class 600
UOP Honeywell / HPCL Vizag	Hydrogen PSA 2 x 12-bed units 45 m each
Air Liquide / HPCL Vizag	Hydrogen membranes 20 vessels 3 skids
BP-ROO, Rumaila, Iraq	3 sour-service fuel-gas skids Ongoing in source profile

Source: AEL profile, pp. 24-32, 34. Status reflects the supplied profile; CTM = custody-transfer metering.

Sameep | Petro Rabigh HOFCC turnaround 2025

L&T (MRU) | Rabigh, Saudi Arabia | 1,050 personnel mobilised

Cyclone removal, anchor welding, replacement of attachments and heavy-equipment handling.

Source: Sameep Brochure 2025, p. 10. Project photographs and scope belong to Sameep.

Sameep | ADNOC Ruwais turnaround 2024

PROJECT: FRACTIONATION UNIT & EQUIPMENT PIPING | RUWAIS, ABU DHABI, UAE

Plant photograph from Sameep's ADNOC reference page.

Source: Sameep Brochure 2025, p. 11. Partner experience; project photograph reproduced from the supplied reference.

END CLIENT: ADNOC

Client: L&T (MRU)

Trains 3 & 4

Sameep scope: turnaround piping works and structural fabrication / erection across fractionation and treatment units.

200 MT

Structural fabrication and erection

Sameep | Oversized fabrication and site erection

Selected project references from Sameep's fabrication portfolio.

IOCL Paradip | Technip

Oversized silos in duplex and stainless steel.
Site fabrication and execution documented in the partner brochure.

HURL | Gorakhpur

Over-dimensional stainless-steel vessels.
Precision fabrication for large equipment with complex specifications.

Source: Sameep Brochure 2025, p. 8. Photographs shown beneath the corresponding project descriptions in the brochure.

Shutdowns and fabrication

FCCU and residue units

Reactor / regenerator internals, cyclones, risers and Y-sections. References include RIL, Nayara, IOCL, HMEL, CPCL and Petro Rabigh.

Coke drums and columns

Weld overlay, CDU / VDU / fractionator top-dome replacement, heavy-wall piping and elevated loops.

Navsari fabrication works

Two 2,000 m² bays; plate cutting up to 100 mm and rolling up to 36 mm. ASME U and National Board R authorisations.

Mobilisation and fabrication scale

HRRL Barmer: over 2,000 MT fabricated. Brochure states capacity to mobilise 1,200-1,500 personnel for shutdown work.

FCCU internals | Critical shutdown work

Shop fabrication | Sameep brochure

Plant maintenance | FCCU & coke drums

FCCU / REACTOR / REGENERATOR

Cyclones and internals; reactor / regenerator domes; riser Y-sections; plenum, bellows and anchor replacement.

COKE DRUM REPAIR & WELD OVERLAY

Arc gouging, overlay removal, grinding, DP testing, automatic weld overlay and final weld NDT.

MECHANICAL & ELECTRICAL SUPPORT

Vessel / nozzle and heat-exchanger repair; piping and alignment. Panels, cabling, termination, loop checks and commissioning through specialist teams.

FCCU / coke-drum scope: Sameep Brochure 2025, pp. 4-5.

Danaster | Industrial trading and site-support supplies

Non-project stores and day-to-day supplies for industrial sites, construction workfaces and camps.

HSE & PPE

Safety stores, personal protective equipment and site-welfare items for workfaces and camps.

Tools & tackles

Hand tools, power tools and day-to-day site equipment for maintenance and construction support.

Consumables & camp stores

Welding consumables, camp stores and general goods supporting routine site operations.

Call-off supply support

Short-lead supply into KSA sites, aligned with the client's agreed scope and requirements.

Scope focus: site-support stores and consumables; line pipe and project bulk materials are outside this offering.

CloudQ | AI, enterprise technology and delivery capacity

Proposed KSA referral association | Al Khobar setup in progress; target 15 October 2026, per director.

650+

Technology professionals

500+

Projects delivered

100+

Enterprise customers

70+

Salesforce-certified experts

Digital transformation & AI

Generative AI, AI agents, predictive analytics and intelligent automation.

Enterprise applications

Salesforce, Zoho and Nintex K2: implementation, customization and integration.

Software engineering

Web/mobile apps, SaaS, custom enterprise systems and application modernization.

Cloud, data & integration

AWS, Azure, GCP; data engineering, analytics, APIs and system integration.

Workflow automation

Digital workflows, business process automation and intelligent document processing.

Managed services & support

Application maintenance, IT managed services and ongoing technical support.

Resource augmentation: consultants, developers, AI/data engineers, cloud/DevOps specialists and project managers.
Delivery options: onsite, offshore and hybrid | Profile reports 5 delivery centres and 24x7 support.

Sources: CloudQ presentation, pp. 6-9; director's proposal. Capability figures are reported by CloudQ.

CloudQ | Potential contribution to industrial clients

Examples for opportunity development - final solution, scope and outcomes to be agreed with each client.

Q-CEO dashboard

Product visual from CloudQ's portfolio. Business dashboards can support management reporting and performance visibility.

Product example; no client deployment implied.

Oil & gas / petrochemicals

Smart checklists, document processing and workflow automation for operational records and approvals.

Manufacturing / industrial

Fabrication/manufacturing ERP, inventory and supply-chain solutions; analytics for production visibility.

Construction / engineering

Digital approval workflows, management dashboards and specialist IT resources for project systems.

Property / facilities management

Rental-property systems and digital service workflows, with integration and ongoing application support.

Also applicable: healthcare, hospitality, retail, logistics, trading, professional services, education and government.

Sources: CloudQ presentation, pp. 9-12; director's proposal. Sector applications above describe potential contributions.

From requirement to handover

01

Requirement

Scope, duty, code, site and schedule captured in AI Khobar.

02

Engineering

Design, 3D coordination and construction packages — Petrocon.

03

Manufacture

Packaged equipment and shop fabrication to the agreed code.

04

Execution

Site works, shutdown support and installation under one plan.

05

Handover

Inspection, testing, documentation and close-out.

KSA opportunity coordination and specialist delivery

Averon coordinates local business development and client requirements. Engineering, equipment and site-work scopes are allocated to the relevant delivery partner under agreed commercial arrangements.

CloudQ: proposed referral association. Averon supports opportunity identification and introductions; CloudQ provides technology solutions, implementation and IT resources under separately agreed engagement terms.
